## **Progress of the Re.M.I.D.A. project**

The European project Re.M.I.D.A had to be extended for one year (until the end of August 2022) due to the pandemic situation that the countries of the project consortium are going through and, consequently, the difficulties of carrying out the project activities in person.

We have held online meetings periodically to determine the new strategies and activities to be carried out, as well as the restructuring of administrative aspects.

A very important decision was to conduct the project training course (Learning/Teaching/Training Activity) online, with operators and trainers from all project partners.

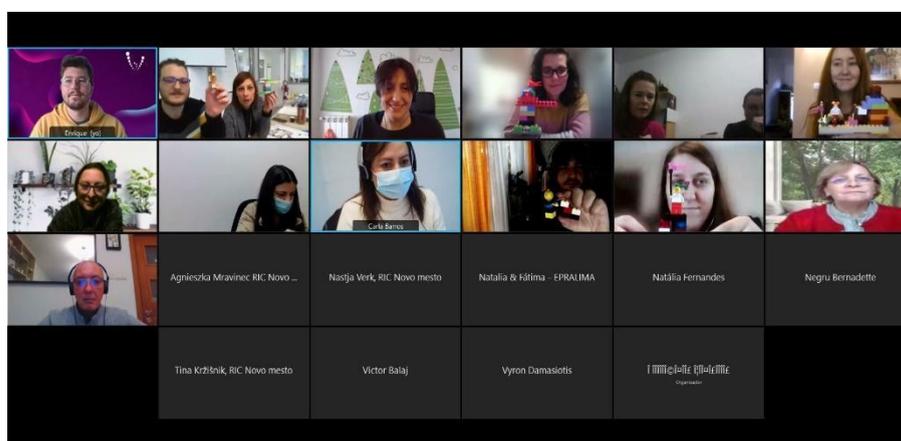

The "REMIDA - Renewed Models for the Inclusion of Disadvantaged Adults" project was born with the aim of supporting the social and labor inclusion of adults over 45 years of age at risk of exclusion (low qualifications and skills, obsolescence, immigrants...) through the objective of testing an innovative model of intervention, aimed at achieving personal empowerment and improving the informal and non-formal skills/capabilities of this target group.

## Adults at risk of exclusion will feel included thanks to the LSP Model

During the week of December 13 to 17, the training course of the Re.M.I.D.A project took place, whose general objective was to support the social work of inclusion of adults at risk of exclusion through the innovative Lego Serious Play Model.

During the course, trainers from different partner countries of the project participated: Consorzio Ro.Ma. (Italy), AGENFAP Società Cooperativa (Italy), Balgarska Agentsiya Za Razvitie (Bulgaria), Inercia Digital (Spain), Razvojno Izobrazevalni Center Novomesto (Slovenia), Centrum Kształcenia Ustawicznego (Poland), Asociatia Central European pentru Integrare ACTA (Romania), Escola Profissional Do Alto Lima (Portugal) and Hellenic Open University (Greece).

During the days of the course, different sessions were held. Among all the theoretical and practical activities, it is worth highlighting some such as the introduction to the Remida project and the LSP Model through the construction of a tower that represents ourselves, with the aim of sharing our skills and key points through this construction; or the collaboration of the operators and trainers to share the different experiences designing a workshop with the Lego Serious Play methodology.

Finally, as a practical activity, the partners built a model that represents the most frequent elements that we face during a mentoring process with disadvantaged people.

## New steps to follow

In the coming months of 2022, local workshops will be held in each partner country (Bulgaria, Spain, Slovenia, Greece, Italy, Poland, Portugal and Romania), with adults in a disadvantaged situation, to carry out the same dynamics that have been carried out by the partners, and thus fulfill the main objective of the project: to support the social and labor inclusion of people over 45 years of age at risk of exclusion through an innovative model of intervention, to achieve personal empowerment and enhance informal skills / abilities and not formal.

## Website and Social Media.

The website and the Social Networks are fundamental elements in the field of project dissemination, since thanks to them we will be able to update news about the project, how the project is progressing, or the different meetings that we have throughout the course of the project. project, we will also show the different outcomes and multiplier events that are planned.

These elements are a showcase for the project, where the relevant information available in the 9 languages of the project (English, Italian, Polish, Slovenian, Bulgarian, Spanish, Romanian, Greek, Portuguese) will be displayed.

These contents are connected to planned online learning, which will soon be available to anyone interested in the project.

Re.M.I.D.A.  
Renewed Models for the Inclusion of Disadvantaged Adults

The project "REMIDA - Renewed Models for the Inclusion of Disadvantaged Adults" was created with the aim of supporting the social and working inclusion of adults 45+ at risk of exclusion (low qualifications and skills, absolute skills, immigrants...) by defining and testing an innovative model of intervention, aimed at achieving personal empowerment and enhancing the informal and non-formal skills / abilities of this target group.
